CHEAP

Look up the word "cheap" in your dictionary. It has many meanings. Most people believe that anything which is called "cheap" is an inexpensive thing. Not on your life. A suit of clothes of "cheap" (poor) material is a costly pur-chase. Good clothes are "cheap" (inexpensive) because they always look well and they last a long time. A Summer suit is regarded by many as a thing to be bought at the "cheapest" (lowest) price possible. This is wrong. The suit is not always cool. It will not wear well. It never looks well. You will have to buy three where you would buy one good one. I make GOOD clothes only. Tropical worsteds, camel's hair cloth, pongee silk, mohairs are all standard cloths. They are the best in the world. When you buy, buy intelligently. It is just as important to buy carefully as it is to labor for what you earn. It is just plain common sense. Forget this "cheap" idea. Look up the word "cheap." You will learn something.
